Milestone 3 - Information about the "another service"

Submit demand:

Add a file called `milestone3.pdf` to your Github that contains information about which external service other than redis that you want to use .explain how would you want to use that service in your bot with 100-400 words.

Tutorial:

We create a Health Detection Line-chat-robot.It's main service is to give users information and advice about the novel corona virus.

Firstly we will give some links of tutorial that teaches users how to use that service.

Secondly according the healthy condition(the temperature users input),the robot will give different advice.The specific process please refer to the following flowchart:

Do you exercise at home?

yes

Some advice about exercise at home...

no

Maybe you should do it . its good for you.

end

Can i have a look about your meal?(picture)
